01 DISCLAIMER OF LIABILITY

NOTE: WE STRONGLY SUGGEST THE READER TO GO THROUGH THE SECTION TITLED "DISCLAIMER OF LIABILITY" COMPLETELY BEFORE PROCEEDING TO READ THE OTHER CONTENTS OF THIS WHITEPAPER ISSUED BY SHIBABITCOIN

Any kind of information, predictions, assumptions, and statistics represented in this whitepaper is completely for GENERAL PURPOSES. It is advised that the information accommodated in this whitepaper cannot be understood as a financial, legal, or advisory council. This whitepaper does not lead to an INVITATION TO INVEST and does not organize or promote any type of contractual obligation. If you come across any queries or doubts, we recommend that you seek assistance from an attorney, accountant, or any deemed fiduciary of your choice. Any reference to external resources or third-party material in the whitepaper is provided for representational purposes only and cannot be understood as any form of approval or endorsement of their information or estimations. By reading this whitepaper, you agree to absolve SHIBABITCOIN from any responsibility for any damages arising directly or indirectly for relying on any information provided in this document. Regarding more queries about legislation and regulations concerning cryptocurrency, we highly recommend that you seek counsel from qualified professionals and your attorney, accountant, or trusted fiduciary.

When drafting this whitepaper, utmost care and diligence were exercised to ensure the integrity of the facts and statements mentioned in the document. However, SHIBABITCOIN does not guarantee the complete accuracy or legal relevancy of the information presented in this whitepaper.

By reviewing and seeking information about SHIBABITCOIN, the reviewer confesses that they have read, understood, agreed, and embraced all the terms and conditions mentioned in the section labeled "DISCLAIMER."

02 EXECUTIVE SUMMARY

Blockchain, the behemoth of the digital era, strangling and ripping the stagnant monolithic policies and regulations of centralized governing bodies overseeing all the transactions ever executed has been derived from the principles of peer-to-peer financial transfers without the involvement of intermediaries. Blockchain not only covers the financial sector of modern-day society but also excellently handles the authenticity and genuineness of the digital as well as physical aspects.

DeFi (Decentralized finance) is a boon of blockchain in the financial sector. According to DeFi Pulse, the total value locked as of November 2021 is nearly \$104.22 billion. It is a movement to create and establish a new financial ecosystem that is open for everyone and does not involve or require trusting intermediaries, such as banks. DeFi relies on cryptography, blockchains, and smart contracts. Smart contracts are self-executing protocols with the terms abiding buyers and sellers directly engraved into lines of code.

To make DeFi reach greater heights, the wind under the wings is introduced - Non-Fungible Tokens. These tokens are the digital representation of any asset in the blockchain. These NFTs hold a special place in blockchain as minting any asset into an NFT represents the individuality of that particular item in the blockchain and the immutable nature of the NFT confirms that the integrity will remain untouched.

SHIBABITCOIN intends to take the blockchain by storm with the creation and implementation of its own cryptocurrency exchange and NFT marketplace platform. Prior to this, SHIBABITCOIN will set sail for the zenith by introducing their indigenous token – SHIBTC. It is an ERC-20 standard token on the Ethereum network that will power the SHIBABITCOIN ecosystem.

03 AN INTRODUCTION

SHIBTC, the native utility token of the SHIBABITCOIN ecosystem, works with the objective to make the investors reap magnificent returns at the lowest risk and minimize effort. This modern-day crypto token aids users all over the world to receive the all-inclusive benefits of decentralization. SHIBTC spotlights sovereignty, scalability, and adaptability. The esteemed crypto-based platform offers decentralized exchange and NFT marketplace for users all across the globe.

The platform assures the audience in its ecosystem with an out-of-the-world trading experience when it comes to trading crypto assets or even NFTs. Being a decentralized platform, it bestows a seamless and frictionless experience to its community and makes it a viable platform for crypto enthusiasts. The DeFi ecosystem of the platform creates permission less buyer-to-seller borrower transactions. It is superior in the sense that the protocol is open, cheaper to transact within, built on novel foundations, and is resistant to censorship. It supports the majority of the DeFi operations, including Staking, Sending, Borrowing, Exchanging, etc., at a minimal transaction fee to provide a fascinating rate of returns accordingly.

On the other hand, the platform's marketplace will be completely loaded with super-rare and branded NFTs, which adds precious value to the collections. The higher the rarity, the higher will be the yield. The NFTs in the marketplace can take the form of artwork, music, photo, video, meme, in-game assets, and any other which the user feels unique.

04 MISSION

SHIBABITCOIN is prospering to connect and associate all crypto admirers by providing a decentralized platform and carefully persuading the most overlooked element, User Experience. Also, it tries to capitalize on the advantages of the SHIBTC, which works to make blockchain more accessible to the average internet user.

05 VISION

SHIBABITCOIN is excited to see everyone get involved in the groundbreaking blockchain technology that brings to our world in the form of DeFi and Non-Fungible Token's authenticity and integrity. SHIBABITCOIN's futuristic views hold the thought to bring fairness, real value, and innovations with its decentralized ecosystem.

Crypto Exchange Platform

Multiple Layer of Intermediaries

The involvement of middlemen or third parties is the next huge deficiency in the industry. For the investors, it becomes very challenging to make efficient investments with the flood of intermediaries. The multiple layers of intermediaries make the process very tiring, and the creators have to pay hefty commission charges for every single process transacted.

Lack of Transparency

Transparency is one of the crucial problems existing in the industry for a very long duration of time. For investors, having a transparent platform is still a dream. The majority of the platforms lack transparency, and this is the factor that directly affects trust among the users. When they are not confident of the process happening on the platform, they have a higher chance of leaving the platform.

Lack of Security

As the financial industry is one of the most recognized industries that serve as the backbone of the world economy. Its transparency and security are still being untouched in this modern era. It is necessary to concentrate on the security and transparency of each transaction. Lack of transparency in these financial services acts as a loophole for fraud and malpractice.

NFT Marketplace

Lack of Traceability

In this colossal world of valuable assets, the ability to trace back a sold asset from the creator is very arduous. They can have a record for first or second trade but definitely not more than that. The digital assets are eligible for resale and they may have crossed many owners. This lack of traceability blocks the creator from receiving their royalties each time when it gets sold to someone else.

Ownership Rights

The whole world is filled with talented individuals who are unique and powerful in their own fields. Fraudulent activities and counterfeits have now become a serious issue to be addressed immediately. The fraudsters steal the ownership rights from the creators and make them stay away from their own masterpieces.

Liquid NFTs

Though majority platforms support NFTs in one way or the other, liquidity of the NFTs is still a prime issue for the traders. The NFTs are now everywhere, and it is imperative to increase the visibility so as to get an ideal value. The chances to get instant liquidity by keeping NFTs as collateral is less comparatively, and it may prevent traders from stepping forward to trade NFTs.

Difficulty in Transferring the Assets

The creators, after creating their masterpiece, would love to transfer it to their fans and followers. They struggle a lot to reach the audience and always seek a better way to make their work recognized by the target audience. Though the crypto market has now come up with certain open and decentralized platforms, it was initially very tough for creators to transfer their assets.

07 SOLUTION THAT SHIBABITCOIN OFFERS

Problems are the key to innovations. All these limitations made us think of alternate solutions that will give the users a hassle-free experience. It is these solutions that gave birth to SHIBABITCOIN as a whole. In order to get rid of these issues, we sought the assistance of powerful technologies such as Blockchain. Have a glance at how these revolutionary concepts lend a hand in getting rid of the prevailing problems.

For Exchange Platform

A Peer-to-Peer System

Our crypto exchange establishes a direct peer-to-peer system, which enables the traders to directly transfer the assets without involving any third parties or middlemen. Ultimately, this makes the process simple, and the creators needn't save apart from their profits for paying commission fees anymore. They can use our platform to meet the right audience and can continue to reap unimaginable profits.

Effortless and Secure Transfer of Assets

Our exchange platform is designed to transfer digital assets securely without any complications. Also, our security features make the platform robust and safeguard it from all nefarious and fraudulent activities. The incorporation of blockchain technology will enable the traders to swiftly communicate and effortlessly get done with the transfer of assets.

Problems are the key to innovations. All these limitations made us think of alternate solutions that will give the users a hassle-free experience. It is these solutions that gave birth to SHIBABITCOIN as a whole. In order to get rid of these issues, we sought the assistance of powerful technologies such as Blockchain. Have a glance at how these revolutionary concepts lend a hand in getting rid of the prevailing problems.

NFT Marketplace

Transparent Nature

Our platform uses the massive support of blockchain and NFT concepts, which account for utmost transparency. Being an open and decentralized marketplace, we give the creators complete freedom to acknowledge the process. We strongly believe that a transparent platform has the potential to seize the attention of the audience, and in turn, it enhances the trust between the audience to make the best use of the platform.

Proof-of-Authenticity

NFTs are known for their ability to stand as proof of authenticity. Through our NFT marketplace, the creators can trade the digital assets, and upon trading, it gives them the ideal ownership rights. It provides no space for tampering with the data and the ownership rights. NFTs will provide exclusive identity to each asset. The owners will have the entire control of the asset's private key, and it will be only this key that provides access to the assets.

Liquidity

Our NFT marketplace ensures instant liquidity for the traded NFTs. We overcome this liquidity issue by giving NFTs a better outreach. Our marketplace ensures instant trade of NFTs, thereby contributing a high degree of liquidity. The liquidity of NFTs enables the creators to tokenize their assets confidently. Also, the higher liquidity of NFTs can make the users gain a handful of profits if the asset is rare or unique. Proof-of-

Legitimate Track of Assets

Our NFT marketplace ensures instant liquidity for the traded NFTs. We overcome this liquidity issue by giving NFTs a better outreach. Our marketplace ensures instant trade of NFTs, thereby contributing a high degree of liquidity. The liquidity of NFTs enables the creators to tokenize their assets confidently. Also, the higher liquidity of NFTs can make the users gain a handful of profits if the asset is rare or unique. Proof-of-

Our NFT marketplace provides the creators with unique functionality to have a track of the assets. Whenever the digital assets are sold or traded, it enables the creator to have a proper record of where the assets are. Also, it facilitates creators with a royalty scheme whenever the asset is sold. This royalty scheme is eternal and thus stands as the lifetime passive income solution.

08

SHIBABITCOIN ECOSYSTEM

The ecosystem comprises two phenomenal crypto platforms, an affluent crypto exchange platform, and a significant NFT Marketplace which are the power boosters of today's crypto ecosystem. The SHIBTC is the native token of the SHIBABITCOIN's ecosystem that facilitates astonishing benefits to the users for effective usage of our services.

Decentralized Exchange

As an eminent crypto service provider, we yearn to bring the audience into the crypto sphere through our quality decentralized exchange services. We bestow them a unique opportunity to trade cryptocurrencies with world-class security, enhanced user interface, and sophisticated functionalities. Our non-custodial services will make the user handle their own private keys to manage their funds and access to a plethora of digital assets.

Ecosystem Perks

Staking: One of the most adored utilities of SHIBTC token is staking. The users can stake the tokens to earn impressive rewards from our exchange. The higher return on investment rates makes them claim exhilarating rewards and profits.

Lending: A peer-to-peer model for lenders and borrowers. It completely eradicates middlemen in the process. As a platform backed by smart contracts, the users can easily trust the process.

Borrowing: SHIBABITCOIN can be used as collateral for borrowing a sum of money to meet financial obligations. The interest rate and the collateralization ratio for the sum borrowed are directly related to supply, demand, and community governance.

Yield Farming: A similar process to staking, in which the users gain handsome returns. The platform features strategic investment opportunities with different pools for intensive returns.

Features of our Exchange

Integrated Smart Contracts: The use of smart contracts will automatically execute the process, adds high security, and makes it immutable

Payment Gateways: The platform is compatible with multiple payment methods that facilitate borderless transactions efficiently.

Captivating UI/UX: The interface is designed in a user-centric approach that offers a simple and engaging user experience for seamless exchange.

Liquidity Management: The users can easily manage their liquidity through our rapid execution of orders.

Digital Wallet: The platform supports multiple wallets to store and manage their traded assets securely.

Perks of our Exchange Platform

Highly Scalable: The Ethereum network facilitates higher stability and reliable security to the platform

High-Speed Transaction at Lower Price: Purchase, sell, trade, withdraw, and swap swiftly at a much affordable price.

Flawless Trading: Our advanced trading features and functionalities will provide a frictionless trading experience to the users.

Excellent Trading Analysis: The Platform facilitates meaningful trade insights for strategic investments.

NFT Marketplace

SHIBABITCOIN is a futuristic tech company that strives to offer phenomenal services in the crypto sphere. NFT is the trend that evolves in the crypto world with its intrinsic value and unique features. These NFTs are being the most expensive crypto assets revolutionizing the crypto ecosystem. Our platform is designed to create NFTs with the existing standards and also adopt new standards in these evolving trends. The platform is currently developed on a robust Ethereum network.

The platform verifies the NFTs and also offers a verified badge for profiles. This builds trust among the investors and NFT collectors to buy your unique NFT as well as offers immediate liquidity for your NFTs.

Features of our NFT Marketplace

Impressive Storefront: The platform's storefront is uniquely designed to capture the attention of potential buyers/investors.

Simple and Advanced Search: With available sort and filters, this feature facilitates users to correctly match with the required NFTs easily.

Simplified Listing: The users can list their NFTs without any complications and can sell them in either fixed-price sale or auction sale.

Wallet: The wallet in the platform aids users in storing their crypto assets and traded NFTs securely.

User Interface: The NFT marketplace's interface is meticulously worked to make it engaging for the users.

Workflow of our NFT Marketplace

- ✔ The creators/buyers can create their profiles and add existing/ new wallets.
- ✔ Creators can upload a digital version of their masterpieces.
- ✔ The title, description, price, and other details have to be uploaded.
- ✔ The digital works can be converted into NFTs by the process of minting.
- ✔ The minted NFTs can be listed in the marketplace for either fixed-price sales or auction sales.
- ✔ Now, the buyers come into action.
- ✔ For NFTs in auction sales, they can place bids. The highest bid in the specified time will win the auction.
- ✔ For NFTs in fixed-price sales, they have to pay the exact price to claim it.
- ✔ Once the transaction is confirmed, NFTs will be transferred to the wallet.

Perks of our NFT Marketplace

Immutable Rights: Blockchain facilitates immutable ownership rights for the owner of the NFTs. It can never be altered.

Excellent Yield: The platform is best-suited for acknowledging the masterpieces of talented creators and reaps lucrative revenues.

Instant Liquidity: The users on the platform can swiftly trade their NFTs, which in turn offers immediate liquidity.

Branded assets: The platform includes all the rare and branded assets and gives a special treat to the NFT admirers. Indeed a valuable collection.

SHIBTC Token's Play in our NFT Marketplace

Being the native token of the platform, SHIBTC contributes greatly in enhancing the concept of NFTs worldwide. The users in the ecosystem can make the best use of these tokens to bestow the minting fees, listing fees, and other miscellaneous fees during their procurement or creation of NFTs.

Thus all the SHIBTC holders will be provided with exciting rewards and bonuses for availing the services of our crypto exchange and NFT marketplace.

The rewards include:

- ✔ Airdrops
- ✔ Transaction cuts
- ✔ Governance
- ✔ Voting rights
- ✔ Staking returns
- ✔ Prior updates

Blockchain Technology

Using the magnificent prowess of the decentralized peer-to-peer network without the involvement of intermediaries, “Satoshi Nakamoto” published the whitepaper “Bitcoin” from which the terminology, Blockchain, bounced which helps in staying always one step ahead of the centralized system in eradicating the chained hierarchy and single point of concentration.

Blockchain is a digital ledger that records all the information regarding any asset on the decentral network. The immutable ledger and its unhackable nature resulted in its boom and helped society in the removal of intermediaries. While blockchain's influence on cryptocurrencies is undeniable, this game-changing technology isn't limited to the financial sector. Blockchain technology is very flexible, having applications across a wide range of sectors, given our society's reliance on technology. Blockchain slowly but surely has integrated with every aspect of society, such as:

- ☑ Finance
- ☑ Healthcare
- ☑ Real estate
- ☑ Technology
- ☑ Sports
- ☑ Fantasy games
- ☑ Arts
- ☑ Music
- ☑ Entertainment

Ethereum Network

If you are familiar with the world of smart contracts, then you must have heard about the Ethereum blockchain. Being a completely decentralized, open-source exchange with its native currency ETHER, it uses the Proof-of-Work methodology to verify the transactions.

The Initial Coin Offerings, which is commonly recognized by its abbreviation ICO, are handled by the ERC-20 tokens of the Ethereum platform. These tokens are the recognized technical standards that are used for all smart contracts on the Ethereum blockchain for the creation and implementation of all Ethereum-based tokens

The ERC-20 tokens are considered to be digital assets with a dynamic value that can be sent and received. These tokens are highly- customizable and can exhibit an astonishing processing speed of transactions. Few of a bundle of advantages of the ERC-20 tokens include,

- ✔ Interaction with other cryptocurrencies
- ✔ Smart contract-based functionality
- ✔ Entirely compatible with similar platforms, projects, and exchanges.
- ✔ Can be incorporated into decentralized applications

10 TOKENOMICS

Token Details

TOKEN NAME SHIBABITCOIN	TOKEN SYMBOL SHIBTC	TOKEN TYPE ERC-20	DECIMAL SUPPORT 20
TOTAL TOKEN SUPPLY 100,000,000,000, 000,000,000	TOKEN PRICE 0.5 Cents	SOFT CAP -	HARD CAP -
ICO START DATE -	ICO END DATE -	HARD CAP -	

Token Distribution

- ✔ Token Sale (Private & Public)
- ✔ Rewards
- ✔ Founder Team
- ✔ Marketing & Advisory
- ✔ Reserved for Development

Fund Utilization

- ✔ Platform & Core Product Development
- ✔ Marketing & Business Development
- ✔ Operations
- ✔ Exchange Listing
- ✔ Reserve
- ✔ Legal

11

ROADMAP

• PHASE 1

- ✔ Market research
- ✔ Verification of technical feasibility
- ✔ Verification of market feasibility
- ✔ Token Deployment

• PHASE 2

- ✔ Constitute the project team
- ✔ Development of centralized crypto exchange platform
- ✔ Creation of whitepaper

• PHASE 3

- ✔ Seed Round
- ✔ Private sale
- ✔ Building community through campaigns

• PHASE 4

- ✔ Public sale
- ✔ Airdrops
- ✔ Listing

• PHASE 5

- ✔ Development of our Centralized exchange platform
- ✔ Launch of the centralized exchange platform
- ✔ Deployment in Android & ios platform

• PHASE 6

- ✔ NFT Marketplace development
- ✔ Implementation of Fractional and Redeemable NFTs
- ✔ Development of Decentralised exchange platform.

12 TEAM DETAILS

Cyber Security Teams

Has a well-versed group of cyber security experts to keep the platform norms and regulations up to date with the rest of the world. KRYPTREX will onionize the security protocol by implementing security layers over layers to take precautionary measures when the time comes
